

Performance of an Advanced Stirling Converter Based on Heat Flux Sensor Measurements

Filesize: 6.6 MB

Reviews

Completely one of the better pdf I have got possibly go through. I really could comprehend every little thing using this composed e book. It is extremely difficult to leave it before concluding, once you begin to read the book.
(Torey Kreiger)

PERFORMANCE OF AN ADVANCED STIRLING CONVERTOR BASED ON HEAT FLUX SENSOR MEASUREMENTS

To read **Performance of an Advanced Stirling Convertor Based on Heat Flux Sensor Measurements** PDF, make sure you click the button below and download the document or have accessibility to other information which are in conjunction with PERFORMANCE OF AN ADVANCED STIRLING CONVERTOR BASED ON HEAT FLUX SENSOR MEASUREMENTS book.

BiblioGov. Paperback. Book Condition: New. This item is printed on demand. Paperback. 22 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. The U. S. Department of Energy (DOE) and Lockheed Martin Space Systems Company (LMSSC) have been developing the Advanced Stirling Radioisotope Generator (ASRG) for use as a power system for space science missions. This generator would use two high efficiency Advanced Stirling Convertors (ASCs), developed by Sunpower, Inc. , and NASA Glenn Research Center. The ASCs convert thermal energy from a radioisotope heat source into electricity. As part of ground testing of these ASCs, different operating conditions are used to simulate expected mission conditions. These conditions require achieving a particular operating frequency, hot-end and cold-end temperatures, and specified electrical power output for a given heat input. It is difficult to measure heat input to Stirling convertors due to the complex geometries of the hot components, temperature limits of sensor materials, and invasive integration of sensors. A thin-film heat flux sensor was used to directly measure heat input to an ASC. The effort succeeded in designing and fabricating unique sensors, which were integrated into a Stirling convertor ground test and exposed to test temperatures exceeding 700 C in air for 10,000 hr. Sensor measurements were used to calculate thermal efficiency for ASC-E (Engineering Unit) 1 and 4. The post-disassembly condition of the sensors is also discussed. This item ships from La Vergne, TN. Paperback.
