Reviews

Great electronic book and helpful one. Of course, it is play, still an interesting and amazing literature. I am just delighted to inform you that here is the finest ebook i have got go through in my own daily life and might be he finest pdf for actually.
(Lora Johns III)

SCIENCE POLICY UP CLOSE.**DOWNLOAD**

Harvard University Press, Cambridge, Massachusetts and London England, 2015. Hardcover. Condition: New. 256 pages. Hardcover with dustjacket. New book. POLITICAL SCIENCE. In a career that included tenures as president of Stony Brook University, director of Brookhaven National Laboratory, and science advisor to President George W. Bush, John Marburger (1941-2011) found himself on the front line of battles that pulled science ever deeper into the political arena. From nuclear power to global warming and stem cell research, science controversies, he discovered, are never just about science. Science Policy Up Close presents Marburger's reflections on the challenges science administrators face in the twenty-first century. In each phase of public service Marburger came into contact with a new dimension of science policy. The Shoreham Commission exposed him to the problem of handling a volatile public controversy over nuclear power. The Superconducting Super Collider episode gave him insights into the collision between government requirements and scientists' expectations and feelings of entitlement. The Directorship of Brookhaven taught him how to talk to the public about the risks of conducting high-energy physics and about large government research facilities. As Presidential Science Advisor he had to represent both the scientific community to the administration and the administration to the scientific community at a time when each side was highly suspicious of the other. What Marburger understood before most others was this: until the final quarter of the twentieth century, science had been largely protected from public scrutiny and government supervision. Today that is no longer true. Scientists and science policy makers can learn from Marburger what they must do now to improve their grip on their own work. John H. Marburger III was Former President of Stony Brook University, Director of Brookhaven National Laboratory, and Science Advisor to President George W. Bush. Robert P. Crease is Professor...
