*Completely essential read publication. It is really basic but excitement in the fifty percent of the book. You will not really feel monotony at anytime of your respective time (that's what catalogues are for about in the event you ask me).*

The length of the arc A B C to a chord of 30 feet, and height 10 feet, will be found by Prob. xxiv, page xxxi, to be 3822 feet, and the radius of the arc of the same dimensions by Prob. xxv, page xxxiii, to be 16 25 feet; therefore, 16-25]4--20-25 the radius of the convex surface; and because the arcs of similar segments are as their radii; hence 16-25: 20-25:: 38-22: the length of the arc D E F, which being found is 47-628. In the triangle g a c of the developement of the spiral upon the coucave surface make a c equal to 38-22 feet, the angle acgequal to 40; then, by the following statement, rad.: tan. 40:: 38-22: a =3207 feet, nearly....
