PRODUCING EGGS IN NEW JERSEY: AN ECONOMIC STUDY (CLASSIC REPRINT) (PAPERBACK)

Forgotten Books, 2018. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from Producing Eggs in New Jersey: An Economic Study Since 1930, production of chickens and eggs has increased more than has that of dairy products and red meats, despite the relatively lower prices received for chickens and eggs. More efficient poultry production explains at least part of this shift. Broilers have replaced farm flocks of chickens as the main component of chicken meat marketings, because of (a) rapid increases in broiler production, (b) fewer hens required for a given volume of egg production with the higher rate of lay per bird, and (c) the increased use of sexed chicks, which has reduced greatly the number of cockerels raised by egg producers in replacement flocks. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at [This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.](#)
