

Social Security: Information about the Accuracy of Earnings Records: Hrd-91-89fs

By -

BiblioGov. Paperback. Book Condition: New. This item is printed on demand. Paperback. 28 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. Pursuant to a congressional request, GAO provided information on studies concerning: (1) the accuracy of the earning records that the Social Security Administration (SSA) maintains; and (2) whether certain workers are more likely to have errors in their earnings records than others. GAO found that: (1) the chances of SSA recording a wage report to the wrong account, or in a different amount than reported, were very small; (2) a 1987 study of a nationwide sample of 1,744 persons who received their first retirement benefit check in June 1985 found that about 6.5 percent had one or more errors in their earnings records, and a 1989 payment accuracy study found a similar error rate; (3) an unpublished internal study of the SSA 1978 suspense file of uncredited earnings provided information about the types of workers who may be most prone to have an earnings record problem; (4) SSA did not credit almost 20 percent of the wage reports filed by businesses involved in agricultural production in 1978 to valid workers social security accounts; and (5) the studies GAO reviewed...
