

A Preliminary Report on the Bauxite Deposit of Georgia (Classic Reprint) (Hardback)

By Thomas L Watson

Forgotten Books, 2017. Hardback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from A Preliminary Report on the Bauxite Deposit of Georgia The deposits at Thoronet and Villeveyrac are very similar in geologic occurrence to those at Baux. They rest on an eroded surface of limestone, of Cretaceous or Jurassic age, and alternate with various lacustral formations. The Villeveyrac deposits are characterized in general by their prevailingly small amounts of iron oxide; while those at Thoronet are non-pisolitic, breaking with a conchoidal fracture, and are dark-red in color. In the Thoronet type, the silica is said to be almost wholly replaced by ferric oxide. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. Reviews

Very useful to any or all group of folks. It really is rally interesting through reading through period of time. Once you begin to read the book, it is extremely difficult to leave it before concluding.

-- Mrs. Dorris Wintheiser

A brand new electronic book with a new standpoint. It is writter in basic phrases rather than confusing. Its been designed in an extremely basic way which is merely right after i finished reading through this publication where basically altered me, change the way i believe.

-- Kitty Crooks
