

An Introduction to the Science of Bidding (Hardback)

By Brian Richardson

Xlibris Corporation, United States, 2006. Hardback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. After some years using published material to teach newcomers the rudiments of bridge bidding, the author became somewhat disillusioned with the approach advocated in the majority of beginning bridge texts. The matters that particularly concerned him were related to the view espoused by many bridge teachers that it is important to keep all bidding natural so as not to confuse beginners. The author felt that if confusion exists, it is likely to be the teaching approach that causes the confusion, rather than the subject matter itself. The proponents of this natural bidding approach, decline to teach beginning students Jacoby Transfer Bids, Weak Two Opening Bids and, in some cases, Stayman. The reason often given is that teaching natural bidding is difficult enough for beginning bridge students, and we should not confuse them by teaching them conventions or treatments that say something different. These same teachers seem to see no inconsistency in their approach of saying, when the students are doing a second (or third) class with them - oh, remember when I told you that when your partner makes an opening...

Reviews

Excellent e-book and useful one. It is written in straightforward phrases rather than confusing. I am just very happy to explain how here is the finest publication I have got read through in my very own lifestyle and might be the greatest book for possibly.

-- **Viva Schuster**

Basically no terms to explain. I have read and so I am certain that I will go through once again once more in the future. I realized this ebook from my dad and I encouraged this book to discover.
